SUMMARY

Results-driven Data Science enthusiast with practical experience in machine learning, data prediction, and NLP. Proficient in Python, SQL, and Power BI, with a strong ability to extract insights and build predictive solutions that support data-driven decisions and business growth.

TECHNICAL SKILLS

Programming : Python, SQL

AI/ML: Supervised and Unsupervised Learning, Deep Learning, CNN, NLP

Libraries: Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn

Tools: Power BI

Other Skills: Data Visualization, Exploratory Data Analysis (EDA), Predictive Modeling

PROJECTS

Mobile Review Sentiment Analysis using NLP | https://github.com/Sham2004N/Mobile_Review_Sentiment_Analysis-using-NLP | Aug-2025

1. Developed a sentiment analysis project using VADER to classify mobile reviews into Positive and Negative.
2. Generated WordClouds to visualize the most frequent words in positive and negative reviews
3. Developed an interactive web interface using Gradio to allow users to input a review and instantly see its sentiment
4. Tools & Libraries: Python, Pandas, NLTK (VADER), WordCloud, Matplotlib, Seaborn

Plant Leaf Disease Detection (CNN, Deep Learning) |

https://www.linkedin.com/posts/shyamnhavkar_machinelearning-deeplearning-computervision-activity-7366333967442001922-525X?utm_source=share&utm_medium=member_desktop&rcm=ACoAAD571zEBBvJMBSiPUCdTeMfBOKK0EJOpKsk_ 12-24-aug-2025

1. Built and trained a CNN model achieving 93% accuracy for classifying plant leaf diseases using image data.
2. Preprocessed and augmented dataset to handle class imbalance, improving model generalization and robustness.
3. Compared multiple models (CNN, Decision Tree, Random Forest, XGBoost) and optimized hyperparameters to enhance performance.
4. Deployed the solution with a Gradio-based interface, enabling real-time disease detection from uploaded leaf images.

Customer Churn Prediction| ML | <https://github.com/Sham2004N/Churn-Prediction-Model> June-2025

1. Built and evaluated multiple ML models (Decision Tree, Random Forest, XGBoost) to predict customer churn with an accuracy of 78%.
2. Preprocessed raw data through feature engineering, encoding, and scaling, improving model performance and interpretability.
3. Analyzed results using confusion matrix, classification report, and accuracy score, ensuring balanced precision and recall.
4. Tools Used: Python, Pandas, Scikit-learn, Matplotlib, Seaborn

EXPERIENCE

Intern - Data Analyst | Cognifyz Technologies

Remote | May-2025 - June-2025

EDUCATION

SSC- 71.20% & HSC- 77%

Bachelor of Engineering (Electronic & Telecommunication) | CGPA: 6.85 (FIRST CLASS) | Savitribai Phule Pune University | 2025

CERTIFICATION

Master in Data Science | 3RI Technologies Pvt. Ltd. | July 2025
