PROFILE SUMMARY

Final-year AI Data Science Engineering student with hands-on experience in data analysis, machine learning, and business intelligence. Proficient in Python, SQL, Excel, and Power BI. Skilled in EDA, data cleaning, model building (Regression, Classification, Random Forest, XGBoost), and interactive dashboard development. committed to turning data into actionable insights for business impact.

EDUCATION

Savitribai Phule Pune University

B.E. in Artificial Intelligence and Data Science

Pune, IN

Nov 2022 – Present

Shri Mahalasakant Jr. College

HSC - Science - 68.19%

Pune

Mar 2022

EXPERIENCE

Data Science Intern — NeuAI Labs

Dec 2024 – Jan 2025

Pune, IN

- Developed a weather data analysis project using Python and Pandas to process and analyze over 10,000 historical weather records.
- Built interactive dashboards with Plotly and Power BI, published via Power BI Service, and created a shareable app for stakeholders.

AI & Data Analytics Intern — Edunet Foundation

Feb 2025 – Mar 2025

Remote

- Developed an interactive Power BI dashboard to track and analyze key sustainability metrics across the supply chain, focusing on carbon emissions, energy consumption, and waste management.
- Applied Power Query for data transformation and DAX for custom calculations; derived actionable insights to reduce environmental impact and support sustainable business strategies using real-world supply chain data.

PROJECTS

Holiday Package Prediction Using Machine Learning | *Machine Learning, Python, Scikit-Learn*

Jul 2025

- Developed a machine learning model using Random Forest Classifier with hyperparameter tuning to predict customer interest in holiday packages, achieving 93.37% accuracy and 0.83 ROC AUC score.
- Cleaned and analyzed a dataset of 4,888 records with 20 features; evaluated model performance with ROC-AUC curve and supported data-driven decision-making for launching a new Wellness Tourism Package.

Loan Default Financial Risk Analysis Dashboard | *Snowflake, SQL Server, Power BI*

Jun 2025

- Collected, cleaned, and modeled financial loan data using SQL Server and Snowflake; performed exploratory data analysis to identify patterns in borrower behavior, default risk, and credit score trends.
- Built and published an interactive Power BI dashboard with DAX measures, filters, and drilldowns to visualize risk metrics; created a shareable app for stakeholders, enabling data-driven decisions on loan approval and risk mitigation.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Excel, Git

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, TensorFlow, Flask, Keras

Data Analysis: EDA, Data Cleaning, Statistical Analysis, Hypothesis Testing, A/B Testing, Time Series

Databases: MySQL, Snowflake, SQL Server

BI & Visualization: Power BI, Google Data Studio, Jupyter Notebook, Streamlit

Machine Learning: Regression, Classification, Random Forest, SVM, KNN, Naive Bayes, XGBoost, PCA, Clustering

CERTIFICATIONS

Complete Data Analyst Bootcamp From Basic to Advance (Udemy)

Jun 2025

Python for Data Science, AI & Development (IBM – Coursera)

Jun 2024

Data Management and Storage in the Cloud (Google Cloud – Coursera)

Nov 2024
