Summary

Aspiring Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and ReactJS. Passionate about building responsive, user-centric web applications and eager to contribute to dynamic UI/UX design implementations.

Technologies

Languages: C, Java, SQL, JavaScript

Web Technologies: HTML, CSS, JavaScript, JQuery, Bootstrap, ReactJS

Tools: Github, VS code

Education

Savitribai Phule Pune University

Sept 2021 - June 2025

BE in Computer Science

- CGPA: 8.77/10
- **Coursework:** Object Oriented Programming, Data Structure and Algorithms, Computer Network

HSC

June 2020 - May 2021

Science

- Percentage: 93.83

SSC

June 2018 - May 2019

- Percentage : 85.80

Internship

Data Science and Machine Learning

YBI Foundation

Dec 2023 - Jan 2024

- Built a machine learning model using the MNIST dataset to recognize handwritten digits (0-9).
- Applied data preprocessing, normalization, and model training using Python, NumPy, Pandas, and Matplotlib.
- Achieved high accuracy in digit recognition and visualized results through confusion matrices and prediction plots.

Java Programming Intern

CodSoft

Jan 2024 - Jan 2024

- Built Java-based applications focusing on core concepts like OOPs, exception handling, file handling, and GUI development. Strengthened problem-solving and programming skills through real-world tasks.

Projects

Speech Emotion Recognition Using LSTM Algorithm

- Developed a deep learning system to detect human emotions (e.g., happy, sad, angry, neutral) from speech using LSTM networks. Leveraged audio feature extraction (MFCC, ZCR, energy) and trained on RAVDESS dataset, achieving robust accuracy. Implemented end-to-end pipeline including preprocessing, feature extraction, model training, and web interface for real-time emotion detection.
- Tools Used: Python, TensorFlow, Librosa

Currency Converter

- Developed a responsive currency conversion tool using ReactJS and JavaScript to fetch live exchange rates from an external API; allowed users to select currencies, input amounts, and instantly view real-time con-

verted values, enhancing the speed and accuracy of currency transactions for travel and commerce.

- Tools Used: HTML, CSS, JavaScript, ReactJS, API Integration

Weather Forecasting System

- Engineered a weather forecasting system utilizing JavaScript to retrieve real-time meteorological data from an external API; displayed key weather metrics for user selected locations, tracking 100+ daily active users after implementation.
- Tools Used: HTML, CSS, JavaScript

Extra-Curricular Activities

Certifications: Career Essentials in Software Development by Microsoft and LinkedIn

Soft Skills: Team Collaboration, Problem Solving, Attention to Detail, Time Management
