EDUCATION

Bachelor of Engineering in Computer Engineering

Genba Sopanrao Moze College of Engineering, Pune

2026 (Pursuing)

Pune, Maharashtra

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML, CSS

Database Management: MongoDB, MySQL, SQLite, Google Sheets API

Frameworks: Flask, React, Node.js, JavaFX, Swing, Pandas, NumPy, Matplotlib, Scikit-learn

Developer Tools: Git, GitHub, VS Code, GitHub Actions

Fundamentals: Operating System, OOP, DBMS, Computer Networks, Data Structure and Algorithms

EXPERIENCE

Python Developer Intern

AI Adventures LLP

Dec 2024 – Feb 2025

JM Road, Pune, Maharashtra

- Developed an Absence Detection System and Monitor Google Sheet using Python, Google Sheets API, and GitHub Actions, automating attendance tracking and real-time monitoring.
- Improved Python course content and created interactive quizzes on the company's MOODLE platform, enhancing learner engagement.
- Strengthened skills in automation, data processing, and industry-grade software development workflows.

Java Developer Intern

ShadowFox

Feb 2025 – Mar 2025

Remote, Chennai, Tamil Nadu

- Built Java-based applications, including a Bank Account System with JUnit (TDD), Library Management System with SQLite/MySQL (CRUD), and a JavaFX Student Information System (MVC).
- Developed a Microservices-Based E-commerce Website with modular REST APIs, enhancing scalability and service isolation.
- Gained hands-on experience with Java, OOP, unit testing, and microservice architecture, aligning with industry best practices.

PROJECTS

Railway Management System | *GitHub: Ganesh-403/Railway-Management-System*

- Built a dynamic web-based Railway Management System using Flask, MySQL, and JavaScript.
- Integrated real-time scheduling, booking, and database operations to streamline operations.
- Designed a responsive UI, improving user interaction and system scalability.

Flight Delay Prediction | *GitHub: Ganesh-403/FlightDelayAI*

- Developed ML models to predict flight delays using scikit-learn, Pandas, and historical data.
- Performed feature engineering and model tuning with Random Forest & Logistic Regression.
- Visualized trends using Matplotlib to identify key delay factors for actionable insights.

Bulk Certificate Generator | *GitHub: Ganesh-403/Bulk-Certificate-Generation-Web-Application*

- Created a Flask-based app to automate bulk certificate creation using Jinja2 and Pandas.
- Enabled CSV-based input parsing, dynamic template rendering, and bulk PDF download.
- Built an intuitive frontend with HTML/CSS/JS to streamline event certificate distribution.

ACHIEVEMENTS

Runner-Up – Prep-A-Thon Coding Competition

Technobash 2025, Genba Sopanrao Moze College of Engineering (GSMCOE), Pune

Winner – Site Craft Web Development Challenge

VAMINT Club 2025, Genba Sopanrao Moze College of Engineering (GSMCOE), Pune
