OBJECTIVE

Enthusiastic and detail-oriented Computer Science graduate with strong foundational knowledge in Java, SQL, and object-oriented programming. Passionate about software development and eager to contribute to innovative engineering teams as Software Developer (Fresher) role.

EDUCATION

Bachelor of Engineering (Computer Engineering) — 7.5 CGPA
Genba Sopanrao Moze College of Engineering, Pune | 2021 – 2025

HSC (PCMB) — 69%
PDEA's Baburaoji Gholap Junior College, Pune | 2019 – 2021

SSC — 73.2%
PDEA's Baburaoji Gholap Secondary School, Pune | 2018 – 2019

SKILL SUMMARY

- **Languages:** C++, Java, SQL
 - **Java Technologies:** Java SE (Core Java), Java EE (Servlets, JSP, JDBC)
 - **Web Servers:** Apache Tomcat 8.0.22
 - **IDE & Tool:** Visual Studio Code, IntelliJ IDEA, Eclipse IDE, MySQL
 - **Version Control:** Git, GitHub
-

PROJECTS

Generalized Data Structures Library | C++

- Developed a library containing generic implementations of major types of data structures.
- Implemented ready-made solutions for fundamental and advanced operations on linear and non-linear data structures in an object-oriented manner.
- Designed the implementations generically, allowing functionality to support any data type.
- Followed all object-oriented design principles throughout the project.

File Packer Unpacker with encryption | Java

- Developed an application to pack and unpack multiple regular files into a single file along with all related metadata.
- Implemented packing functionality to consolidate multiple files and unpacking functionality to extract individual files with complete details.
- Integrated encryption and decryption techniques to ensure data security during the packing and unpacking processes.
- Designed and implemented a graphical user interface (GUI) to allow users to interact easily with the application.

A Virtual DBMS System | Java

- Developed a project to illustrate the core concepts of database management systems (DBMS).
- Created a virtual table and implemented custom logic to process SQL queries and perform database operations based on user input.
- Utilized Java Collection Framework extensively to manage data storage, retrieval, and manipulation within the system.

Hotel Reservation System | Java, JDBC, MySQL

- Built a command-line hotel reservation system with room booking, update, and deletion functionalities.
- Implemented core Java concepts including exception handling, input validation, and modular design.
- Performed CRUD operations using JDBC and SQL, interacting with a table in MySQL.

- Gained hands-on experience in Java-MySQL integration and backend application development
-

CERTIFICATIONS

- **Problem Solving (Basic)** – HackerRank
Completed: Jun 2025
Covered fundamentals of Data Structures (Arrays, Strings) and Algorithms (Sorting, Searching).
 - **GEN AI Foundation in Java Development** – LinkedIn
Completed: Jun 2025
Learned how to integrate Generative AI concepts into Java development workflows, covering AI fundamentals, Java-based AI tooling, and real-world applications.
-

SOFT SKILLS

- Good analytical and Problem-Solving skills.
 - Knowledge of implementing Data structures using procedural programming and object-oriented programming.
 - Knowledge of Java database Connectivity.
-

LANGUAGES

- English, Hindi, Marathi
