

PARTH TATE

Pune, India | +91 8999028533 | parthtate575@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Entry-level software developer skilled in building secure web applications with JavaScript & Python, with hands-on experience in React, Next.js, Django, & cloud deployments on Vercel and Render. Delivered production-grade features including real-time chat, role-based access control, AI-powered content moderation, and robust authentication. Looking for Front-end, Python, or Full-stack developer roles in fast-paced teams.

Projects

Anonify - Full-stack anonymous messaging platform.

[GitHub Repository](#) (team repo)

Front-end & Back-end Developer (Team of 4)

Tech Stack: Next.js, React, Node.js, MongoDB, Auth.js, Tailwind CSS, Python, Zod

- Built a full-stack anonymous messaging platform using React and Express.js with real-time WebSocket chat supporting 100+ concurrent users and role-based access control.
- Integrated Python-based AI moderation to filter 200+ toxic messages/day with 95% accuracy.
- Developed a responsive admin dashboard with Zod validation and Tailwind UI, reducing moderation time by 40%.

Mega Blog-App - Production Blog-Post Platform | Full-Stack Developer

[Live Demo](#) | [GitHub Repository](#)

Tech Stack: React, Appwrite (Auth/DB/Storage), Context API, Redux, Vercel

- Built a production-ready blog with image uploads to Cloudinary, rich-text editing, and protected routes; deployed on Vercel.
- Implemented Redux Toolkit for centralized state management and Appwrite for authentication/data persistence.
- Delivered CRUD operations with optimistic UI updates, reducing code redundancy by 30%.

Tweet Center - Django-based Social App | Full-Stack Developer

[Live Demo](#) | [GitHub Repository](#)

Tech: Python, Django (ORM, Admin, Forms), Bootstrap, Cloudinary (Media), SQLite, Render

- Built a Twitter-inspired web app with secure user authentication (signup, login, logout) using Django's built-in auth system.
- Implemented text and image posts with Cloudinary for scalable media storage and CDN delivery.
- Created a responsive Bootstrap UI with main feed displaying all user posts; utilized Django Admin for post management.
- Deployed on Render with optimized static/media file handling.

YouTube-Style Video Manager (Hackathon Project) — Skill IT Academy, Solo

[GitHub Repository](#)

Tech Stack: Python, CLI, JSON file I/O

- Built a Python CLI video manager with full CRUD operations using JSON file storage; implemented a menu-driven interface without external dependencies.
- Solved hackathon constraints (no internet, no DB) with core Python; auto-creates data file & handles video title/duration management.
- Delivered single-script solution under time pressure and presented implementation to judges.

Technical Skills

- **Front-end:** React, Next.js, Tailwind CSS, Bootstrap
- **Back-end:** Node.js, Express.js, Django
- **Auth/Platforms:** Auth.js, Appwrite, Vercel, Render
- **Databases:** MongoDB, SQL
- **Tools:** Git/GitHub, Postman, REST APIs, Zod, Context API, Redux

Hackathons & Certifications

- Skill IT Academy Hackathon — Certificate of Participation
- Road Safety Hackathon (NHAI) — Certificate of Participation
- Introduction to Programming Using Python — Certificate (Spoken Tutorial, IIT Bombay)

Education

Genba Sopanrao Moze College of Engineering.
B.E. in Computer Engineering (Completed, CGPA: 7.62)

2022 – 2025
Pune, India
