Summary

A passionate and results-driven AI & Machine Learning student with a strong focus on driving business growth through data-driven insights. Experienced in presenting analytical findings to stakeholders, creating impactful reports, and leading teams to foster innovation. Dedicated to enhancing customer experiences, optimizing processes, and consistently achieving targets that deliver exceptional outcomes.

Education

Savitribai Phule Pune University	Pune
TEML	2024-25
Savitribai Phule Pune University	Pune
SEML	2023-24
Savitribai Phule Pune University	Pune
FEML	2022-23

H.S.C	March-22
Savitribai Phule Pune University	Pune
S.S.C	March-20

Skills

Languages: Python, MySQL, Business Intelligence, HTML, CSS, JavaScript, AWS.

Technologies: TensorFlow, Scikit-learn, LLM, Keras, Snowflake, pydantic, Power BI, Excel, Tableau.

Framework: LangChain

Projects

House Price Prediction using Linear Regression Model Duration:

Duration: January 2025

Organization: Prodigy InfoTech (Internship Project)

Summary: Developed a machine learning model to predict house prices using linear regression based on features such as square footage, number of bedrooms, and bathrooms. Performed comprehensive exploratory data analysis (EDA), data preprocessing, and model training using Python libraries like Pandas, Matplotlib, Seaborn, and Scikit-learn. Evaluated model performance using metrics such as Mean Squared Error (MSE) and R^2 score. Successfully visualized data trends and prediction results through interactive plots and graphs.

Key Skills: Python, Linear Regression, Scikit-learn, Data Preprocessing, EDA, Model Evaluation, Jupyter Notebook, Matplotlib, Seaborn

Agentic-AI (Agent-Search)

AI-Powered Research Assistant – Python, LangChain, Groq LLaMA-3, DuckDuckGo, Wikipedia API

Developed an intelligent research assistant using LangChain agents and Groq's LLaMA-3 model to generate structured research summaries. Integrated tools for web search (DuckDuckGo), Wikipedia extraction, and automated saving of reports to text files. Designed Pydantic-based schemas for consistent outputs and prompt templates for controlled LLM behavior. Built modular tools (`search_tool`, `wiki_tool`, `save_tool`) for reusability. Automated multi-source research reduced manual effort and improved efficiency in information gathering.

Key Achievements

Research Paper: [Generative AI in Healthcare](#)

Journal: IJARESM, Vol. 13, Issue 4, April 2025.

Authors: Sai More, Shreyash Musmade, Harsh More.

Summary: Published a paper on the applications of Generative AI in healthcare, highlighting its use in medical imaging, drug discovery, and personalized treatment. Discussed benefits, challenges, and ethical concerns of using GANs and other models in clinical settings.

Research Paper: [Student Management System Using Power BI](#)

Journal: IJARESM, Vol. 13, Issue 4, April 2024.

Authors: Sai More, Shreyash Musmade, Tanvi Petkar.

Summary: Published a research paper titled "*Student Management System Using Power BI*" in the International Journal of Enhanced Research in Management & Computer Applications, focusing on data management, interactive dashboards, and predictive analytics for improved institutional decision-making.

Certification

- Certificate of "Completing an internship" issued by Prodigy Infotech Pvt. Ltd.
- Certificate of "Data Fundamentals" issued by IBM SkillsBuild.
- Certificate of "What is Generative AI" By LinkedIn Learning.
- Project Certificate of "Introduction to Microsoft Excel" By Coursera Project Network.
- Certificate of "Microsoft Excel- Learn MS Excel for Data Analysis" By Udemy.
- Certificate of "Databases with Python: MySQL, SQLite & MongoDB with Python" By Udemy.
- Certificate of "Deep Learning: Neural Network with Tensorflow" By Udemy.
