CAREER OBJECTIVE

I'm a curious and driven individual with a strong interest in development, cybersecurity, and virtualization. I enjoy building efficient, real-world solutions and have gained hands-on experience working on technical problem-solving. I adapt quickly, enjoy learning new technologies, and thrive in collaborative environments. Through this internship, I hope to contribute meaningfully while growing as a developer and problem-solver.

EDUCATION

- D.A.V. Public School | 10th - 89.8% | 2007-2020 |
 - AEMS Junior College | 12th - 88.8% | 2020-2022 |
 - GSM College of Engineering (SPPU) | Bachelor of Engineering (BE) in Computer Engineering | 2022- Current (CGPA of first 3 Years - 7.42)
-

TOOLS AND TECHNOLOGIES

- Programming & Scripting Languages: C++, Python, Jinja, JSON, HTML, CSS, SQL
 - Technologies: Data Science, Cybersecurity, Virtual Desktop Infrastructure (VDI), Virtual Private Network (VPN), Cloud Computing
 - Telemetry System Development: Loki, Grafana, OpenTelemetry, and Prometheus
 - Databases & Systems: SQL Server, Hadoop Distributed File System (HDFS)
 - Data Structures and Algorithms (DSA)
 - Enterprise Products: Fortinet: FortiSIEM and FortiSOAR
 - Threat Intelligence Tools: VirusTotal
 - Project & Product Management Tools: Software Development Life Cycle (SDLC), Agile Methodologies, JIRA, Microsoft 365
 - Certifications & Recognitions: FortiSOAR Design and Development, Engineering Excellence – Accops Hackathon 2025 (Topic: Telemetry Systems for Workspace Client)
-

PROFESSIONAL EXPERIENCE & PROJECTS

2nd Internship - Intern as a Developer in C++

Accops Systems Pvt. Ltd. | June 2025 – August 2025

- Contributed to telemetry system development using Loki, Grafana, OpenTelemetry, and Prometheus, helping build monitoring solutions for workspace clients.
- Gained practical exposure to Virtual Desktop Infrastructure (VDI), VPN systems, and cloud-based infrastructure.
- Participated in performance tuning and backend support for secure remote access platforms.
- Awarded Engineering Excellence at Accops Hackathon 2025 for the project “Telemetry Systems for Workspace Client”.

1st Internship - Security Operations Analyst Intern

SpryIQ Technologies Pvt. Ltd. | Jan 2025 – Apr 2025

- Built multiple automation playbooks in FortiSOAR and FortiSIEM for incident response.
- Designed an IP Enrichment Playbook using VirusTotal, FortiGuard, and other threat intelligence sources. Automated alert severity escalation, email notifications, and task creation to reduce manual effort and enhance response time.
- Led development of a Brute Force Attack Investigation Playbook, integrating user/IP enrichment, AD data, and threat feeds. Enabled automated blocking of malicious IPs and disabling of compromised accounts.
- Improved analyst efficiency by correlating multi-source telemetry data and leveraging dynamic decision logic and APIs.

Additional Projects

Technical Analysis of Zomato Stock (Python):

- Performed time-series analysis on historical stock data using Pandas, NumPy, Seaborn, and Matplotlib. Visualised moving averages, volatility, and seasonal return patterns for financial insights.

Amazon Homepage Clone (HTML/CSS):

- Recreated the Amazon homepage layout using HTML5 and CSS3, focusing on responsive design, visual accuracy, and understanding front-end design structure.
-
