EDUCATION

Genba Sopanrao Moze Collage of Engineering (SPPU)

Bachelor of Engineering in Computer Science and Engineering

CGPA : 8.21 / 10 (Third Year)

Pune, Maharashtra

Sep 2023 – June 2026

Government Polytechnic Ambad

Diploma in Computer Science Engineering

Percentage : 84.57 %

Jalna, Maharashtra

Aug 2020 – June 2023

TECHNICAL SKILLS

Programming Languages: Java (Core), Python, JavaScript

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, Bootstrap, Firebase, REST APIs

Databases: MySQL, MongoDB, Firestore

Tools & Platforms: Git, GitHub, VS Code, XAMPP, AWS

Core Computer Science Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS

Cybersecurity (Basic Exposure): Burp Suite, Secure PortSwigger Labs (hands-on), Penetration Testing Fundamentals

EXPERIENCE

Full Stack Web Developer (Freelancer)

Ursplit.com

May 2024 – Present (Remote)

- Developed end-to-end web applications using **MERN** stack, **PHP**, **MySQL**, and **REST APIs** for dynamic client solutions.
- Built secure interfaces and backend logic with **Node.js** and **React**, including role-based **authentication** and data **validation**.
- Optimized features such as search, recommendations, and inventory lookups using data structures and algorithms.
- Integrated admin dashboards with analytics, real-time updates, and robust authentication mechanisms.

Web Development Intern

OwnTap Consultancy Services Pvt. Ltd

July 2022 - August 2022

- Implemented real-time features and authentication with Firebase Auth and Firestore.
- Applied data structures and algorithms to optimize database operations and UI responsiveness.
- Assisted in database schema design, REST API integration, and backend workflows for scalable web applications.

PROJECT

Jarvis AI Voice Assistant - Python Application | *Python, Speech Recognition, REST APIs*

- Engineered a Python-based voice-controlled AI assistant, inspired by JARVIS, to automate desktop tasks and retrieve real-time information.
- Implemented modules for voice recognition (SpeechRecognition) and text-to-speech (pyttsx3) synthesis to enable a hands-free, interactive user experience.
- Integrated various APIs and libraries to perform commands such as opening applications, searching Wikipedia, telling the time, and fetching live weather data.

Netflix Clone - React Web Application | *React.js, Firebase, Firestore, TMDB API*

- Built a responsive Netflix clone using **React.js**, creating a seamless browsing experience with reusable UI components for displaying content rows and banners.
- Leveraged the **TMDB REST API** to dynamically load and render movie information and implemented a movie trailer pop-up feature.
- Engineered the application with **React Router** for client-side navigation and managed application state for a smooth user experience.

E-commerce Platform - Full Stack Web Application | *PHP, MySQL, HTML, CSS, Javascript*

- Developed a fully functional e-commerce platform for an online footwear store from the ground up using core PHP and a MySQL database.
- Engineered essential user-facing features, including secure user registration/login, a dynamic product catalog, shopping cart functionality, and order processing.
- Implemented a dedicated admin panel to manage products, update inventory, view customer orders, and oversee user accounts, ensuring comprehensive site management.
