Pune, India

SUMMARY

I am a motivated and detail-oriented Computer Science post graduate with a strong foundation in Full Stack Web Development and Java programming. I excel in building responsive web applications utilizing modern technologies including HTML, CSS, JavaScript, and frameworks like React and Node.js. I have hands-on experience with RESTful APIs, JWT authentication, and various databases. My goal is to contribute effectively to a development team while continuously evolving my skills in the software development field

EXPERIENCE

Software Developer Intern

Avanir Technologies Pvt. Ltd 11/2025 Pune, India

- A technology company focused on innovative software solutions
- Developed a full-stack Smart Job Portal with secure role-based access for Admin, Recruiter, and Job Seeker
 - Implemented resume-job matching using keyword extraction, skill-based scoring, and resume parsing
 - Built RESTful APIs with optimized database queries for job posting, application tracking, and advanced search/filter functionality

EDUCATION

Master of Computer Applications (MCA)

Pune University (SPPU) 08/2024 - 06/2026 Pune, India

SKILLS

React	Java	Gmail	GitHub	HTML
CSS	JavaScript	Node.js	Express.js	
REST	JWT	MongoDB	Git	ES6+
React Hooks	Redux	React Router		
Material UI	Bootstrap	Tailwind	OAuth	
Middleware	JIRA	Postman	Axios	
Agile	SDLC	Visual Studio Code		
Eclipse	WhatsApp	C/C++		

PROJECTS

Real-Time Chat Application (WhatsApp Clone)

01/2023 - 01/2023

- A clone of WhatsApp featuring real-time chats and secure user data
- Built a real-time messaging system enabling instant one-to-one communication with message delivery in milliseconds
 - Implemented secure user authentication and authorization, ensuring private access to chats and user data protection
 - Designed message storage and retrieval with online/offline status handling, providing a smooth and reliable chat experience

Login & Registration System

02/2023 - 02/2023

- A robust login and registration system for web applications
- Built a secure login and registration system with proper user validation, error handling, and smooth authentication flow
 - Implemented user authentication and authorization to ensure only verified users can access protected features
 - Added data security measures such as encrypted credentials and controlled access to prevent unauthorized usage
