Professional Summary

I am an undergraduate student in **Artificial Intelligence and Data Science** with a strong interest in building intelligent systems using Python. I have hands-on experience working on LLM-powered applications, autonomous multi-agent systems, and FastAPI-based backend APIs through internships and personal projects. Along with AI development, I have worked on data analysis, automation, and model-driven features to improve system efficiency. I enjoy applying AI and data science concepts to real-world problems and continuously learning through practical, project-based work.

Professional Experience

Emilio Beaufort | Developer – Tech Team

Jul 2025 – Sep 2025

- Developed and integrated AI-assisted components using **Python and FastAPI**, improving dynamic data handling, scalability, and user engagement by **40%**.
- Implemented **SEO, analytics automation, and model-based content optimization** in collaboration with the Tech Team, enhancing data-driven decision-making and increasing engagement by **25%**.

Acmegrade Pvt Ltd | Tech Intern

Jan 2025 – Mar 2025

- Built **Python and MySQL** backend data management modules to support product and user analytics, ensuring efficient data processing and storage.
- Automated data validation using **Pandas** and integrated analytics dashboards via **Flask APIs** in collaboration with data and web teams, improving data accuracy by **30%**.

Projects

Codecraft AI — Autonomous Multi-Agent Code Archit

[CODE](#) | [LINK](#)

Python | FastAPI | LangChain | AutoGen | Reinforcement Learning | GitHub Actions

- Built an **autonomous multi-agent AI system** where specialized agents (*Architect, Coder, Tester, Reviewer*) collaboratively design, generate, test, and review production-ready Python code through **human-like progressive workflows**.
- Implemented **LLM-driven reasoning, coordination, and self-reflection** using LangChain, and, improving code refinement accuracy by **40%** and reducing redundant iterations by **30%**.
- Deployed a **scalable AI orchestration backend** using FastAPI and CI pipelines via GitHub Actions, demonstrating **self-improving AI-driven software automation**.

AIAgentFlow: Visual AI Agent Workflow Builder

[CODE](#)

Python | FastAPI | React.js | OpenRouter API | AI Automation

- Developed a full-stack AI workflow platform enabling users to visually connect intelligent agents (researchers, summarizers, and writers) into autonomous pipelines, improving task automation by **50%**.
- Integrated **OpenAI-compatible LLMs** via the OpenRouter API for multi-step reasoning, reducing manual input time by **45%**.
- Built modular back-end orchestration using **FastAPI** and **Python**, enhancing scalability and processing speed by **40%**.

Technical Skills

Languages & Tools: Python, SQL, Java, Jupyter Notebook, Git, GitHub, VS Code, Postman

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Flask, FastAPI

AI/ML: LLM Integration (OpenAI, Gemini), Predictive Modeling, NLP, Feature Engineering

Databases: PostgreSQL, MySQL, MongoDB

Core Skills: Machine Learning, Data Analysis, API Integration, AI Workflow Design

Education

- BE in Artificial Intelligence and Data Science** 2022 -2026
Third Year GPA: 8.69 | Second Year GPA: 8.59 | First Year GPA: 7.04
- Higher Secondary Education** March 2022
Percentage: 65.17%
- Secondary School** March 2020
Percentage: 82.20%
