SUMMARY

Motivated and detail-oriented Information Technology student with strong skills in software development, machine learning, and database systems. Proficient in C++, Python, Java, and modern development tools. Eager to contribute to innovative teams and continuously expand technical knowledge. .

SKILLS

Technical Skills:

Languages: Python, Java, C++

Tools & IDEs: Git, Android Studio, Visual Studio Code, AWS

Frameworks & Libraries: OpenCV, Scikit-learn, TensorFlow, NumPy, Pandas

Databases: SQL

Concepts: OOP, Data Structures, Algorithms, Machine Learning

Behavioral Skills:

Team player, Problem-solving, Leadership, Hard Work, Perseverance, Positive attitude.

EDUCATION

Bachelor of Engineering in Information Technology

July 2022 - June 2025

College : Genba Sopanrao Moze College of Engineering

CGPA: 8.42/10

Diploma in Computer Engineering

May 20219 - March 2022

All India Shri Shivaji Memorial Society's Polytechnic (AISSMS).

Percentage: 86%

Secondary Education (Class X)

St. Vivekananda English medium School.

Percentage: 77%

PROJECTS

- **Dual-Method Timetable Generator Using Ai and Genetic Algorithm** : Developed an AI-powered timetable generator using Python Django and React, combining AI prompt-based draft generation with a Genetic Algorithm for conflict-free, optimized class scheduling.
- **Bank Administration System using C++**: It helps to understand C++ programs and use of features like inheritance, Class and objects, file handling, constructor and destructor. It also helps to use the object oriented programming skills.
- **Handwritten-digits recognition** :The most commonly used dataset for this task is the MNIST dataset, which contains 60,000 training images and 10,000 testing images of handwritten digits.
- **Sign Language interpreter using python** : Creating a sign language interpreter using Python involves designing a system that can recognize and translate sign language gestures into text or speech. It takes training and testing dataset using CV library.
- **Movie Recommendations in Machine Learning** : A movie recommendation system is an intelligent algorithm that suggests movies to users based on their past viewing behavior, ratings, and preferences.

CERTIFICATIONS

- Introduction In Programming Kotlin (Google)
- Gold Badge in C++ (HackerRank)
- Basic (SQL) - (HackerRank)
- LeetCode (200 Days Badge)
- AWS
-

HOBBIES & INTEREST

- Reading Book
- Tabla
- Drawing
