Nanded, Maharashtra, India.

Summery

Currently pursuing a degree in Computer science at GSMCOE, with strong proficiency in software development and data structures and algorithms **(DSA)**. Skilled in front-end technologies such as HTML, CSS, and JavaScript, Bootstrap, as well as C++ for software engineering and algorithmic problem-solving. Demonstrates a robust understanding of development principles, efficient coding practices, and solution architecture, with the ability to design, implement, and optimize complex systems.

projects

Book2Books

Developed a dynamic Book2Books application using HTML, CSS, and Bootstrap that allows users to efficiently manage their tasks. The app features a user-friendly interface for adding, editing, and deleting tasks, with real-time updates and persistence through local storage. Designed with a responsive layout and interactive elements, it demonstrates strong proficiency in front-end development.

Mini Expense Logger

Created a Expense Logger application using HTML, CSS, and JavaScript that provides real-time Expense updates based on user input. The app fetches data from a user Logger API to display overall expenses, it demonstrates skills in API integration, dynamic content updates, and front-end development.

Skills

- Excellent verbal and non-verbal communication
- DSA
- Web-development
- Problem Solving

Education

Genba Sopanrao Moze college of engineering, balewadi, Pune	2022-2026
Computer Engineering	
Gujarati High School, Nanded	2019 - 2020
HSC	First-class distinction

LANGUAGES	TOOLS USED	INTERESTS
HTML, CSS, JAVASCRIPT, MySQL, c++, MongoDB	- VScode -GitHub	Music, Travelling, Reading, Sketching
