B. E. (Pursuing)
--

Skills

- Frontend languages :- HTML, CSS, JS,
- Backend language :- C,C++,Java , OOPS concept
- Database language :- SQL

Projects

- **E-Commerce Website Clone**
Developed a front-end clone of an e-commerce platform inspired by Amazon, using HTML, CSS, and JavaScript. The project simulates a simplified online shopping experience, showcasing key user interface features found in real-world retail websites.
- **Key Points**
 - Designed multiple responsive web pages including homepage, product listings, and product detail views
 - Implemented a dynamic shopping cart using JavaScript to add, remove, and update item quantities
 - Utilized localStorage to persist cart data across sessions without a database
 - Built a navigation bar, search functionality (front-end only), and basic category filtering
