PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building AI and Generative AI solutions using Python, Machine Learning, Deep Learning, NLP, Computer Vision, and LLM technologies. Experienced in RAG-based applications using LangChain, FAISS, embeddings, semantic search, prompt engineering, and structured LLM outputs. Familiar with LLM evaluation, model inference, fine-tuning concepts, and AI deployment using AWS EC2. Published 3 research papers in AI and Data Analytics.

TECHNICAL SKILLS

Languages: Python, SQL
AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI
LLM & GenAI: LangChain, RAG, Prompt Engineering, Pydantic, Fine-Tuning, Embeddings, Semantic Search
LLM Engineering: Structured LLM Outputs, Chunking Strategies, Hybrid Retrieval, BM25, Reranking, LLM Evaluation, Hallucination Reduction
Database: PostgreSQL, Vector Databases (FAISS)
Libraries: NumPy, Pandas, Scikit-learn
Tools & Cloud: Git, GitHub, AWS EC2, VS Code, CI/CD

EDUCATION

B.E. Artificial Intelligence & Machine Learning **2022–2026**
Genba Sopanrao Moze College of Engineering, Pune

HSC **2021–2022**
Shri Chhatrapati Shivaji Junior College

SSC **2019–2020**
Shri Chhatrapati Shivaji Madhyamik Vidyalaya

PROJECTS

AI-Enabled Employment Matching Platform

- Developed an end-to-end resume–job matching platform using **TF-IDF, BM25 and SBERT** for hybrid semantic and keyword-based matching.
- Built Django REST APIs with PostgreSQL for resume, job and candidate data management, and implemented Celery + Redis for asynchronous resume processing and batch matching.
- Designed the matching pipeline to extract relevant skills and generate ranked job recommendations based on resume–job similarity.

Generative AI Research Assistant

- Developed a **LangChain-based AI research assistant** capable of handling research queries through prompt engineering and tool orchestration.
- Implemented structured **JSON outputs**, modular chains and document/query processing to produce consistent and usable responses.

AI Fitness Trainer

- Built a computer-vision-based fitness application using **OpenCV and MediaPipe** for real-time human pose estimation.
- Implemented pose landmark tracking, joint-angle calculations and rule-based logic for **exercise detection and repetition counting**.

Sales Forecasting System

- Developed a machine-learning-based sales forecasting system using **time-series analysis, feature engineering and regression techniques**.
- Performed data preprocessing, trend analysis and feature creation to identify sales patterns and improve prediction performance.
- Built forecasting workflows to estimate future sales and support data-driven inventory and business planning.

INTERNSHIP

Machine Learning Intern, Prodigy InfoTech **Jan 2025–Feb 2025**
Developed SVM-based cat vs dog classifier with preprocessing, feature extraction, hyperparameter tuning and evaluation.

CERTIFICATIONS

- Deep Learning with TensorFlow (Udemy)
- Data Fundamentals (IBM SkillsBuild)
- Git & GitHub Bootcamp (Udemy)
- What is Generative AI (LinkedIn Learning)
