

SHREYASH MUSMADE

Aspiring AI/ML Engineer and Data Analyst with hands-on experience in Machine Learning, Deep Learning, Natural Language Processing, and Generative AI. Proficient in building robust predictive models, performing advanced data preprocessing, and applying statistical analysis using Python and modern ML frameworks such as Scikit-learn, TensorFlow/Keras, PyTorch, and Hugging Face Transformers. Experienced in designing interactive dashboards and impactful data visualizations using Power BI, Excel, and Tableau. Serving as an NSS Lead Coordinator, demonstrating strong leadership, collaboration, and organizational skills, with a passion for transforming real-world challenges into meaningful, AI-driven insights.

EDUCATION

- SHRI CHHATRAPATI SHIVAJI
MADHYAMIK VIDYALAYA, DEOLALI
PRAVARA**
2019 - 2020
- SHRI CHHATRAPATI SHIVAJI JUNIOR
COLLEGE, DEOLALI PRAVARA**
2020 - 2022
- GENBA SOPANRAO MOZE COLLEGE OF
ENGINEERING, BALEWADI, PUNE**
2022 - 2026

SKILLS

- Technical :** Python, SQL, Business Intelligence (BI), AWS
- AI/ML :** Machine Learning, Deep Learning, NLP, Generative AI
- LIBRARIES :** NumPy, Pandas, sk-learn, Matplotlib, Seaborn, TensorFlow, OpenCV
- LLM & GenAI Tools:** Hugging Face Transformers, LangChain, Pydantic
- BI & Visualization Tools :** Power BI, Tableau, Excel
- Communication**

LANGUAGES

English
Hindi
Marathi

WORK EXPERIENCE AND PROJECTS

Intern – Machine Learning | Prodigy InfoTech Pvt. LTD.
House Price Prediction using Linear Regression Model
Jan 2025

Developed a Linear Regression machine learning model to predict house prices using key features like square footage, bedrooms, and bathrooms. Conducted EDA, data preprocessing, model training, and evaluation using Python tools such as Pandas, Matplotlib/Seaborn, and Scikit-learn. Measured performance with MSE and R² score and visualized trends and predictions through clear graphs and plots.

- Developed a house price prediction model using linear regression.
- Performed data preprocessing, EDA, and feature engineering.

Agent Search – Generative AI Research Assistant
Jan 2026

Built a Generative AI-based research assistant using Python, LangChain, and ChatGroq (LLM) to generate structured research summaries from user queries. Integrated tools like web search and Wikipedia retrieval, and automated saving outputs in JSON/text format for organized results. Implemented prompt engineering, data parsing (Pydantic), API integration, and tool orchestration to automate the complete research workflow, delivering summaries with sources and tool usage details.

Coffee Shop Sales Dashboard – Power BI
June 2025

Developed an interactive Power BI dashboard to analyze and visualize key business metrics using cleaned and structured data. Implemented DAX measures, KPIs, charts, filters, and slicers to deliver actionable insights and improve decision-making. Performed data cleaning and analysis using Excel and Power BI tools to ensure accurate reporting and effective dashboard design.
